

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings of claims in the application:

LISTING OF CLAIMS:

1.(original) Toothbrush (1) comprising a handle (15) and a brushing head (2), characterised in that the brushing head comprises two brushing compartments (3, 4), an upper brushing compartment (3) being able to receive the teeth of an upper jaw, and a lower brushing compartment (4) being able to simultaneously receive the teeth of a lower jaw.

2.(original) Brush according to claim 1, characterised in that the upper brushing compartment and the lower brushing compartment are firmly attached to each-other.

3.(currently amended) Brush according to ~~one of claims 1 to 2~~ claim 1, characterised in that the brushing head is generally H-shaped, with the upper brushing compartment forming an upper part of the H-shape and the lower brushing compartment forming a lower part of the H-shape.

4.(currently amended) Brush according to ~~one of claims 1 to 3~~ claim 1, characterised in that internal walls (6, 8, 13, 14) of the upper and lower brushing compartments are provided with flexible brushing elements (7) extending radially over the internal walls.

5.(currently amended) Brush according to ~~one of claims 1 to 4~~ claim 1, characterised in that the brushing head is curved.

6.(currently amended) Brush according to ~~one of claims 1 to 5~~  
claim 1, characterised in that the brushing head is detachable.

7.(currently amended) Brush according to ~~one of claims 1 to 6~~  
claim 1, characterised in that the handle is mounted pivotably  
(16, 18) on an external wall (17) of the brushing head.

8.(original) Brush according to claim 7, characterised in that  
the external wall of the brushing head is provided with at least  
one means for fastening the handle (19) onto the said external  
wall.

9.(currently amended) Brush according to ~~one of claims 7 to 8~~  
claim 7, characterised in that the external wall of the brushing  
head is provided with two fastening means (19) which are able to  
maintain the handle in two stable and opposite positions.

10.(currently amended) Brush according to ~~one of claims 1 to 9~~  
claim 1, characterised in that it is electric.

11.(new) Brush according to claim 2, characterised in that the  
brushing head is generally H-shaped, with the upper brushing  
compartment forming an upper part of the H-shape and the lower  
brushing compartment forming a lower part of the H-shape.

12.(new) Brush according to claim 2, characterised in that  
internal walls (6, 8, 13, 14) of the upper and lower brushing  
compartments are provided with flexible brushing elements (7)  
extending radially over the internal walls.

13.(new) Brush according to claim 3, characterised in that  
internal walls (6, 8, 13, 14) of the upper and lower brushing  
compartments are provided with flexible brushing elements (7)  
extending radially over the internal walls.

14.(new) Brush according to claim 11, characterised in that internal walls (6, 8, 13, 14) of the upper and lower brushing compartments are provided with flexible brushing elements (7) extending radially over the internal walls.
